SUMMARY

Java Backend Engineer with 4+ years of experience building scalable, high-performance microservices for enterprise systems. Deep expertise in Spring Boot, Kafka, distributed systems, and cloud-native deployments on AWS, Azure & GCP. AWS Certified Developer & Azure Administrator. Full-stack exposure with Angular.

SKILLS

Languages & Frameworks: Java 8/11/17/21, Spring Boot 3.x, Spring MVC/Batch/Security/Data JPA, Hibernate, Spring Cloud, Angular (AngularJS)

Databases: Oracle, PostgreSQL, MySQL, DynamoDB, MongoDB, Redis (Caching), Stored Procedures, SQL Optimization

Messaging & Cloud: Apache Kafka, RabbitMQ | AWS, Azure, GCP (GKE, Cloud Run, Pub/Sub), Docker, Kubernetes

DevOps & Tools: Jenkins, CI/CD, Git, Maven, Gradle, IntelliJ IDEA, Eclipse, Tomcat, JBoss, Postman, Swagger, Github Copilot AI

Core Skills: Microservices, System Design, Event-Driven Architecture, DSA, OOP, OOAD, Design Patterns, SOLID, TDD, Agile/Scrum

EXPERIENCE

Systems Engineer — Java / Spring Boot / Backend Developer

Tata Consultancy Services

Jul 2022 – Present | Indore, India

- **Architected Java/Spring Boot microservices** for high-volume enterprise systems; optimized SQL queries & indexing (Oracle/PostgreSQL), reducing API response time by **30%**; built Spring Batch ETL pipelines processing **5M+ records/day** — **40%** faster.
- Implemented **event-driven architecture** with Kafka & RabbitMQ — producers, consumers, topics, partitions — handling **10K+ messages/min** in high-concurrency environments; implemented **Redis-based caching** to reduce DB load and improve response times.
- Engineered data access layers with **Spring Data JPA, Hibernate, and Cassandra**, optimizing performance across relational and NoSQL data stores; reduced asynchronous processing latency with **Spring WebClient**.
- Secured REST APIs with **JWT/Spring Security**; implemented **API Gateway & service discovery**; containerized services on **Kubernetes (AWS/Azure/GCP)** with GKE, Cloud Run, Pub/Sub; built CI/CD pipelines.
- Improved system reliability by **20%** via JUnit/Mockito/Spring Test test coverage and proactive production monitoring; resolved critical production issues with minimal downtime.
- Developed **Angular frontend components**; led **HLD/LLD design discussions**; enforced **SOLID & Clean Code** principles via code reviews.

PROJECT HIGHLIGHTS

AML / Financial Monitoring System (FMS) — Tata Consultancy Services

Tech Stack: Java, Spring Boot, Spring Batch, Spring Cloud, Oracle, PostgreSQL, Kafka, JWT, Keycloak, API Gateway, Eureka

- Built a **KYC-based transaction monitoring system** that screened customer transactions against sanctions lists and compliance rules, automatically generating **AML alerts** for suspicious activity — reducing manual review effort and improving regulatory compliance coverage.
- Developed **Spring Batch pipelines** for transaction processing, customer data loading, sanctions screening, and alert simulation; integrated **XML file ingestion** for bulk data feeds from external compliance sources.
- Built RESTful APIs and **Spring Cloud API Gateway** with **Eureka service discovery**; secured the platform with **JWT and Keycloak SSO** (OAuth2) for enterprise-grade authentication and authorization across services.

E-Commerce Order Management System | github.com/pk12799/microservices

Tech Stack: Java, Spring Boot, Kafka, PostgreSQL, Resilience4j, JWT, Docker, Prometheus, Grafana, Jaeger

- Designed and built an end-to-end e-commerce order management system with 4 decoupled microservices — order, payment, inventory, and notification — coordinated via a **Kafka-based Saga pattern with outbox table** to ensure reliable, consistent transactions across distributed services.

- Implemented **Resilience4j circuit breakers** for fault tolerance, **JWT-based authentication** for secure API access, and a full observability stack (**Prometheus + Grafana + Jaeger**) for real-time metrics, alerting, and distributed tracing across all services.

CERTIFICATIONS & EDUCATION

AWS Certified Developer – Associate (Feb 2024 – Feb 2027) | **Microsoft Certified: Azure Administrator Associate**

B.E. Computer Science — Sagar Group of Institutions, Bhopal | 2022

ACHIEVEMENTS

Technical Excellence Award | Contextual Master Award — Tata Consultancy Services
